

TIFTUF™ BERMUDA GRASS?

TifTuf™ Bermuda grass grown and supplied by Daleys Turf is the product of almost 25 years of research and development from one of the world's leading turf breeders, the University of Georgia.

TifTuf™ has been hand selected out of almost 30,000 different Bermuda varieties for displaying superior qualities in drought tolerance, shade tolerance (4-5 hours directly sunlight required daily), wear tolerance and winter colour while, at the same time, maintaining excellent turf quality.

TifTuf™ has a very fine leaf blade with dense growth, making it ideal for a wide variety of applications. Its density enables it to handle high wear situations such as school playgrounds, backyards and sports fields. The fine blade ensures shade tolerance and a very soft leaf to walk and play on. TifTuf™ Bermuda grass has been scientifically engineered to produce a great looking year round lawn with superior quality and minimal maintenance required.

Prior to its release, TIFTUF™ had been further tested in 19 drought-stress trials, two sports field wear tolerance trials, utilising the Cady traffic simulator, and four irrigated, non-stress trials. All of this to ensure that your new TifTuf Bermuda lawn will stand the test of time.

TifTuf™ is available exclusively from Lawn Solutions Australia accredited and certified turf growers, which Daleys Turf is proud to be. Available now for \$12.50 per metre, delivery charges may apply. Please see our delivery area map to learn more.

WHY CHOOSE TIFTUF™ BERMUDA GRASS?

- Hand selected from over 30,000 different varieties of turf grass
- A culmination of almost 25 years of research conducted by the world's leading turf grass scientists
